

UPDATED Notice of Power Outage 29 Queens Quay East

February 12, 2018 – 8 am to 10 pm

On February 12th the power will be shut off in 29 Queens Quay for 14 hours, from 8 am to 10 pm. This shut down is necessary to enable the setup of the permanent power supply for the Pier 27 Phase 3 tower, 15 Queens Quay East. The construction management team apologizes for this inconvenience and is providing advance notice to ensure that residents of 29 Queens Quay may have adequate time to prepare.

The electrical work that will be done during the power outage will permit the establishment of the permanent power supply for the Phase 3 construction site. This work is in compliance with the original Pier 27 electrical power delivery design. This permanent solution will replace the temporary setup and ensure safe, separately metered power for Phase 3.

During the power shut down emergency lights be on in the hallways, stairwells, and the lobby. 1 elevator per tower will be in service. Power will remain on in the parking garage levels.
